

SAW THAT COMING

In the chest you find a page from Nicolas' journal which reads

You might not believe me, but I was the first magician to perform the saw-an-assistant-in-half trick. At least, the first to put them back together successfully. Some spectators were so shocked that they created a big hullabaloo and the authorities came in and shut us down. They said I was a "threat to public safety and decency" or some nonsense.

Not to be stymied, I worked out a less-graphic act where I instead sawed words in half. Now any bozo off the street can break a word in two, but what made my performance special was that the top and bottom halves themselves were still words. The audiences were fickle though - it took me a while to figure out that they were only impressed when the halves were balanced. For nostalgia's sake here's my first ever set, which didn't go over 100% with the crowd. Oh well, you live and you learn.
